Indonesia International Transport Summit (IITS) 2025

1.500+ Participants

50+ Speakers

11 Sessions

40+ Countries

15+ Exhibitors

## ITS Indonesia

ITS Indonesia is a member of ITS Asia Pacific Forum and ITS World Community, a non-profit organization set up jointly, between industry, academia, government agency, and community in order to encourage development initiatives and the use of intelligent transport systems for safe and convenient transportation ecosystem.

## Our Vision

Making ITS Indonesia a platform for intelligent mobility providers and digital transportation ecosystem which supports economic recovery and growth, to equitable and environmentally sustainable mobility.

## Our Mission

- Promoting Digital Transformation;
- Enhancing Integrated Urban Transport System;
- Facilitating Smart Driving & Logistics;
- Promoting New & Renewable Energy Ecosystem;
- Creating Safe and Sustainable Mobility.

Mobility Atlas

INDONESIA  
INTERNATIONAL  
TRANSPORT  
SUMMIT 2026

## An Economic Leap through Intelligent Transport Decarbonization

### The Indonesia International Transport Summit 2026

is the strategic bridge where state-of-the-art mobility breakthroughs meet the unique realities of the Global South.

Hosted by ITS Indonesia, the summit demonstrates that by integrating intelligent solutions, transport decarbonization is not a cost—it is the primary engine of modern economic growth.

Acting as a regional laboratory, IITS 2026 unites leaders from across the Global South to bridge next-generation innovations with practical, people-centric solutions—providing the essential gateway for businesses to align with national strategic plans, while scaling solutions across emerging markets.

# Summit Highlights

## Global South as the Main Stage.

The Global South's mobility transformation at the center - this is the main stage.

## An Engine for Modern Economic Growth.

Intelligent systems as a fuel to transform transport decarbonization into a powerful economic driver.

## Digital Systems in Action.

A green reality powered by data, intelligent systems slash emissions while maximizing efficiency and effectiveness.

## Strategic Market Access

Connecting global innovation to covert regional gaps into the world's most agile, tech-enabled mobility markets.

## Universal Access and Connectivity.

Bridge high-tech innovation with inclusive, accessible solutions to ensure the future is a shared victory for all.

# Key Value Proposition of IITS:

What makes us different from other transport events?

## 01 The "Green Leap"

As a platform to demonstrate how intelligent and data-driven systems allow developing nations to directly transform into high-efficiency, zero-emission mobility systems, optimizing existing infrastructure while building the future.

## 02 Strategic Market Access

As a platform to provide the definitive gateway to connect global innovators with high-growth leaders across Latin America, Africa, and Asia-Pacific.

## 03 Policy-to-Industry Synergy

As a platform to bridge businesses with Indonesia's strategic development plans.

## Green Dividend

### Capitalizing Decarbonization in Transport Sectors as Economic Growth Engine

Strategic dialogues within this track provide the roadmap to unlocking the economic multipliers of transport decarbonization by establishing intelligent systems as the core enabler, setting the tone for IITS 2026.

Policy-to-Action | Driving High-Value Investment | Intelligent Solutions for Fiscal Optimization | Carbon-as-a-Service | Low Emission Zone | Digital Green Bond | Leapfrogging Strategy

## Energy Sovereignty

### Orchestrating Energy Resilience with Vehicles Electrification

Riding on the rise of the vehicles electrification and the movement from fuel dependency to new renewable energy (NRE), this track centers on how intelligent transport systems accelerate the transition and create the ecosystem that will better ensure energy resilience.

Fuel Cell-to-Electric Vehicle | Smart Charging & V2G (Vehicle-to-Grid) | EV Battery Telemetry | Smart Hydrogen Hubs | B50 and E5 | Supply and Demand Security

## Equitable Transition

### Empowering People for the New Mobility Era

This track focuses on future proofing and bridging the social divide in the face of disruptive technologies, ensuring that smart mobility leads to economic empowerment through data-driven policy and accessible innovation.

Inclusive Analytics | Account-Based Mobility & Mobility-as-a-Service | Urban Air Mobility | Digital-to-AI Reskilling | Workforce Transformation | Gender-Responsiveness

## Supply Chain

### Digitalizing the Resilient and Integrated Supply Chain

Transitioning beyond reactive response to preventative intelligence, this track outlines how AI and intermodal connectivity eliminate the economic and social burdens of high-risk mobility, establishing a new global standard for safe, smart, and resilient transport systems.

Vehicle-to-Everything | Digital Twin | Fleet Management | AI-based Monitoring Systems | Maintenance-to-Emergency Management | Digital Enforcement

## Intermodal Mobility

### Integrating Digital and Physical Mode of Transportation

This track centers on strategic investment in modernizing intermodal hubs to ensure seamless, high-capacity movement with sustainable and intelligent variation of mode.

Transit-Oriented Development | Integrated Payment System | Mass Transit Expansion

## High-Level Panel

- Plenary Sessions
- Special Interest Sessions
- Strategic Roundtable Discussion

## Stakeholder Communication

- Business Networking
- Academia & Civil Society Forum
- Exclusive Dinner Reception

## Exhibition & Demonstrations

- Exhibition Space
- Exhibition Stage
- Technical Visit

## What Will You Get

**Showcase solutions  
to 1.000+ participants.**

**Meet government  
leaders, innovators,  
and startups.**

**Build influence in  
frontier markets.**

**Connect and be  
seen where the next  
breakthroughs.**

## Expected Attendees

### Government

- Coordinating Ministry of Infrastructure and Regional Development
- Ministry of Transportation
- Ministry of Finance
- Ministry of Creative Economy
- Jakarta Transportation Agency
- Medan Transportation Agency
- Nusantara Authority - OIKN

### Financial Institutions

- Multilateral Development Banks
- World Bank
- Asian Development Bank

### Transportation Industries

- Transjakarta
- MRT Jakarta
- KAI
- Pertamina
- LRT Jakarta

### Non-Governmental Organization

- ITS Singapore
- ITS New Zealand
- ITDP

INDONESIA PAVILION  
AT GANGNEUNG  
ITS World Congress  
2026

Overview

<b>Date &amp; Venue</b>	Mon-Fri, 19-23 October 2026 Gangneung Olympic Park, Gangneung, Korea
<b>Theme</b>	Beyond Mobility, Connected World
<b>Hosted by</b>	Ministry of Land, Infrastructure and Transport (MOLIT); Gangneung City
<b>Organized by</b>	2026 Gangneung ITS World Congress Organizing Committee, ITS Korea
<b>Program Highlights</b>	High-level Roundtable, Academic sessions, Exhibition, Technical Visits & Demonstrations, Official & Social Programs, Side Events
<b>Projected Participation</b>	Over 60,000 attendees from 90 countries

Objectives

-  Generate strategic transfer of knowledge and technology for Indonesia
-  Scale global branding and partnership of Indonesia's ITS development
-  Promote Jakarta as a Global City: Toward 500 Years of Jakarta
-  Strategic step toward Indonesia's bid to host the ITS World Congress 2032

INTELLIGENT  
TRANSPORT SYSTEM  
WORLD CONGRESS 2026

19-23 OCTOBER 2026  
GANGNEUNG OLYMPIC PARK  
GANGNEUNG, KOREA

The ITS World Congress is an international congress launched by the International Organization of Intelligent Transportation in America, Europe, and the Asia-Pacific region, which is the most influential comprehensive international congress in the field.

Since 1994, countries on three continents have taken turns holding it once a year to promote the research of cutting-edge technologies in the field and the application of intelligent transportation systems.

<b>20,000+</b> sqm EXHIBITION AREA	<b>200+</b> EXHIBITORS	<b>60,000+</b> VISITORS	<b>90+</b> COUNTRIES
---------------------------------------	---------------------------	----------------------------	-------------------------

WHY GANGNEUNG?

Gangneung Urban Information Center

Gangneung Urban Information Center

A medium-city (Population of 200,000) with leading tourist destination in Korea, visited by more than **33 million people a year (2024)**.

Despite challenges such as **over-tourism, limited transport infrastructure, and various urban issues** faced by many mid-sized cities worldwide, including aging populations and demographic decline, **Gangneung is overcoming these difficulties by establishing a smart city model based on Intelligent Transport Systems (ITS) technology.**

## PLENARY SESSION 1

## President's Note

### Indonesia International Transport Summit 2026 Jakarta, Indonesia

On behalf of ITS Indonesia, I am pleased to welcome you to the **Indonesia International Transport Summit (IITS) 2026**. Under the theme “Global-South Mobility Atlas,” we gather to ignite “An Economic Leap through Intelligent Transport Decarbonization,” architecting an ecosystem where digital innovation, safety, and sustainability form the foundation of our Net Zero future. **Serving as a strategic platform** for the Indonesia Transport Decarbonization Roadmap—led by the Coordinating Ministry of Infrastructure and Regional Development—IITS 2026 demonstrates how smart, green infrastructure transforms an emerging market into a global hub. From multi-modal networks to Green Port and Urban Air Mobility initiatives, we are proving that the Global South is the frontier for resilient, high-growth mobility.

We warmly invite **government, industry, academia, civil society, media, and international partners to join this dialogue as the Global South Mobility Atlas**, ensuring our unique challenges are met with smart, safe, and sustainable solutions. Together, let us turn intelligent decarbonization into a shared economic catalyst that defines a more equitable and connected world.

**William Sabandar**  
President of ITS Indonesia
